

E-Reg Consulting - Business Website, Bootstrap

<http://www.e-regconsulting.com/>

1. Introduction

- A brief introduction to your website idea. State the goals of the project.
 - Give a needed update to a real-world clients' existing website. A friend of mine does environmental services consulting and his website is BAD
 - Add responsiveness, SEO, and a modern look & feel while staying lightweight
 - Write all code from scratch (no templates)
 - Store in online repo (GitHub)
- The values / benefits (tangible and intangible) this application can bring to a company/organization/end user
 - Greater impact for new and existing clients searching for the E-reg's goods and services
 - Communicate a modern aesthetic and polished image to reinforce expertise

2. Expected List of Features

- A brief list of features that you expect your website to support
 - Single Page style
 - Modern, sleek, minimal, easy to navigate
 - Mobile-responsive (Phone, Tablet, Desktop)
 - Necessity for modern website
 - Hero/Jumbotron-style home screen
 - Emotionally impactful, aesthetically pleasing

03/11/20

- Fixed/Sticky Navbar below hero image
 - Ease of navigation, current/relevant design
- Services section w/ cards (animate/flip on click to reveal details)
 - Marketing
- About Us section
 - Create trust, share credentials, tell a story
- Testimonials section
 - Continue to build trust
- Contact Us section w/ Bootstrap form
 - Site finishes with call to action w/ form and option to place a call

3. Market Survey

1. www.libertyes.com- extremely outdated, similar to client
2. www.anamarinc.com – more up to date than client
 - Large headers, multiple pages, social links, news feed, blog
3. www.miami-environmental.com
 - Early 2000s design, single page, weird math question as security for contact us form
4. www.airmd.com
 - Modern design, responsive, slideshow banner, **certifications on banner**, **FAQ section**, **cookies message**
5. www.cmenvironmentalfl.com
 - Nav bar with elements that are not aligned, services cards section with cheesy pop-in animation, wall of text About Us section, two blog entries, **mission statement** **footer**

4. References

- *Give references to any material / websites / books, et cetera, relevant to your website idea*

I'm going to base my design *somewhat* around this template I found on Bootsnipp, but trying to code all from the ground up to minimize total lines of code (the template is very heavy

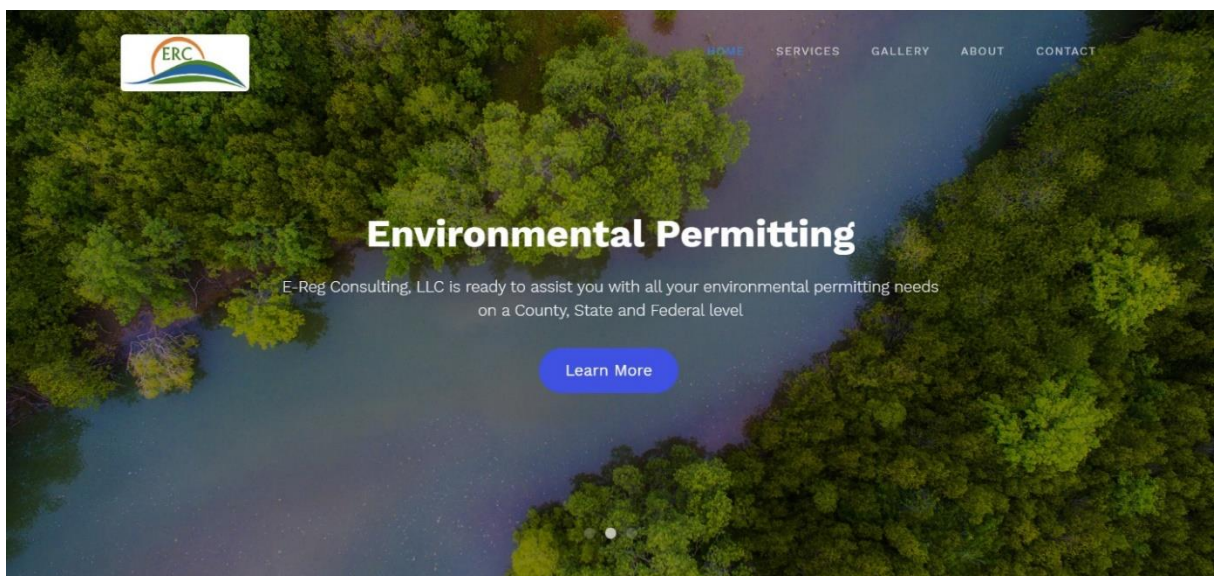

03/11/20

weight, SASS, etc). Mainly incorporating a big hero graphic, services card, a testimonials section, and Bootstrap-styled form. Screenshots of the design I'm working on so far:

Anamar ES – Gainesville, FL

HOMEABOUTSERVICESPROJECTSNEWSCONTACT

Creative thinking. Effective solutions.

ANAMAR Environmental Consulting, Inc. is a woman-owned small business headquartered in Gainesville, Florida, with an office in Portland, Oregon, serving the West Coast. ANAMAR offers a variety of environmental services to government, industry, and private enterprises as well as other professional consulting organizations. ANAMAR is a versatile company that specializes in environmental sampling and monitoring, project design and management, data review and interpretation, and report preparation. As a small business, ANAMAR is able to provide individual attention to each aspect of a project and meet the specific needs of our clients with a professional, cost-efficient, and scientific approach.

ANAMAR personnel have diverse educational and professional backgrounds with degrees and experience in Business Administration, Chemistry, Computer Science, Ecology, Engineering, Environmental Science, Fisheries Science, Geography, Natural Resource Conservation, Soil and Water Science, Statistics, and Toxicology. Our staff's combination of skills and understanding of ecological systems allows us to provide our clients with an array of services to address complex environmental and permitting questions.

If you are interested in our services or need additional information, please [contact us](#) with any questions.

EIS/NEPA Process

As ports and harbors are being expanded and deepened, the need for designation of new Ocean Dredged Material Disposal Sites (ODMDS) is increasing. Formally designating an ODMDS can be a multi-year process; however, inviting early agency coordination and public involvement during identification and development of alternative sites may shorten the process and ensure that the most suitable and acceptable site is selected. This approach has been used...

[READ MORE](#)

Rapid Habitat Assessment

Prior to the initiation of the Naval Station Mayport Homeporting Deepening Project in 2011, the possible presence of habitat at one of the selected ocean disposal sites was brought to the attention of the U.S. Environmental Protection Agency (EPA) and the U.S. Army Corps of Engineers (USACE). The presence of this habitat had not been documented during the ocean disposal site designation process and was previously unknown to EPA, USACE, and the resource agencies...

Your Florida Home or Office Could Be Harming You

We also provide these services in: Coral Gables, Pinebrook Pines, Miami Beach, Kendall, Miami Gardens.

Environmental issues can exist within an indoor environment. AIRMD and our network of consultants specialize in assessing and testing for contaminants in residential and commercial spaces. Our team of experienced consultants performs diagnostic assessments, sampling and our detailed reporting process produces precise reports so action can be taken if required.

In addition to the services listed above, AIRMD consultants also conduct phase and origin assessments, industrial hygiene studies, environmental claims investigations, odour/effluve response, construction hygienic testing, water loss, protocol development, restoration project management and disturbance investigations.

The investigative process includes identifying the issue(s), determining the cause and extent, documenting the extent of the issue(s) and providing recommendations for corrective measures. All projects requiring sampling utilize nationally accredited independent laboratories and all projects completed include comprehensive diagnostic reporting.

Call us, we are here to help.

CM Environmental Services – Ocala, FL

Generally speaking, excepting Air MD, these websites feel like lessons in what not to do, BUT it does show an apparent need for modernization of this sector's web presence (which could be a future business opportunity), and they do have recurring elements (such as "Services") that show what content is expected to be present by prospective website visitors.
